WHAT CAUSES COLDS?

This question and "How to Prevent Colds" is asked a thousand times every day. A cold is really a fever, not always caused by the weather but due to a disordered condition of the blood or lack of important foodelements. In changing seasons fatfoods are essential because they distribute heat by enriching the blood and so render the body better able to withstand the varying elements.

This is the underlying reason why the medicinal fats in Scott's Emulsion quickly overcome colds and build strength to prevent more serious sickness. It contains nature's medicinal fats, so skillfully prepared that the blood profits from every drop, and it is free from harmful drugs or alcohol. 44-67 Scott & Bowns, Bloomfeld, N. J.

The following letter to "Amigo Listo" tells the story of one small phase of the work undertaken by this fund, as follows:

"I desire to express my very great appreciation of the generous supply of much needed and nourishing food new being given daily by the 'Amigo Listo' to so many children at the Franklin school. They otherwise might have had to be out of school, and surely would have suffered severely in this time of great stress.

"I wish also to thank you for the interest taken in the families of school children. In many instances only your ready response has prevented much suffering among our little folks.
